Skills - Focus Technologies: Javascript, React, CSS3, HTML5

Technologies used in projects: **Tools** – Git | Github | Netlify | Heroku

Front - Typescript | Javascript | React | Redux | HTML5 | CSS3 | Bootstrap | Vite

Back - Node | Express | PostgreSQL | MongoDB | Apollo | Urql

Projects - Portfolio Site

My Fitness Store - Source Code - Video Clip - Live Site

An eCommerce demonstration with login authentication and order submission to database

· Built a GraphQL API with the MERN stack, interacting with a database written in MongoDB

· Styled with Bootstrap and CSS, responsive for mobile screens through to 4K

· Features pagination, form validation and a functional shopping cart

Weightlifting Log - Source Code - Video Clip - Live Site

An application for tracking weightlifting data and progress

· Built a RESTful API with the PERN stack, interacting with a database written in SQL

· Handled AJAX with the Axios HTTP client

Lift Equivalence Calculator - Source Code - Video Clip - Live Site

A tool for planning out weightlifting programs

· Managed app state and side-effects on virtual DOM render with React hooks

· Embraced modular coding practices with functional React components

Arhythmetic - Source Code - Video Clip - Live Site

An application for training basic arithmetic skills

· Focused on appropriate use of gridboxes and CSS animation to achieve a functional layout

· Utilised vanilla Javascript to interact with the browser DOM

Education

· Bachelor of Biomedicine, University of Melbourne, 2017 - GAMSAT Medical Admissions Test: Top 0.8%

· ATAR Australian Tertiary Admissions Rank: 99.80
